DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Barkan.

Claim 1: Barkan (5,864,667) teaches a method of managing the use of keys in a cryptographic co-processor (col.5, lines 15-21), selecting a key from one of a symmetrical key type and an asymmetrical key type (col. 5, lines 30-34), selecting a bit length from the selected key (col. 7, lines 56-59), generating the key (col. 6, lines 66-67), and representing the key in one of an external form, diskette, which is exchanged among users (col. 19, 63-65 and col. 20, lines 4-6) and an internal form through exchange by communications means (col. 19, 66-67) in the public key state/form.
